RESPONSE TO ADVISORY ACTION

In an Advisory Action mailed July 13, 2007, the Examiner indicates that the Affidavit filed July 3, 2007 was not fully considered, the Examiner contending that it requires "extensive search and consideration." In the Advisory Action, the Examiner suggested that Applicant label the document or provide an explanation "e.g. cover sheet" of the document that is Exhibit 1, the Examiner contending that the Examiner is not clearly certain which document is Exhibit 1. The Examiner also noted typographical errors on the Affidavit wherein "1. I am one of the inventors..." is repeated twice.

In response, submitted herewith is a document with a cover sheet indicating Exhibit 1 containing, as set forth in the previously submitted Declarations, the document used in preparing a Korean Patent Application based on the conception of the invention by the inventors and forwarded to the Assignee of the present invention on October 10, 2002. Exhibit 1 consists of the document in Korean followed by a statement by a translator and an English translation of the document.
